JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

This is the midwinter season, but as the thermometer in the city never falls below 20° C. at night, there is no reason why mosquitoes should be injured by the temperature. The board of health under the management and direction of Doctor Cruz, the director-general of public health of the Republic, has done most efficient work.

*Report from Bahia--Summary of plague.*

Consul Morawetz reports, July 5, as follows:

Cases of bubonic plague at Bahia from January 1 to July 5, 1906: January, 5 cases, 3 deaths; February, 23 cases, 16 deaths; March, 27 cases, 28 deaths; April, 12 cases, 6 deaths; May, 7 cases, 2 deaths; June, 9 cases, 9 deaths; total, 83 cases; 64 deaths.

The last death occurred on June 28, and the last new case developed July 2, 1906.
